KELSEY'S Rhododendrons, Azaleas

and Other Hardy

Native American Plants

Grown in the Carolina Mountains

HIGHLANDS NURSERY, Saginaw, N. C.

at 3,800 feet elevation.

and

BOXFORD NURSERY, Boxford, Mass.

Information

HIGHLANDS NURSERY SHIPMENTS are made from Pineola, N. C., freight station, and prices in this list are made on this basis. Freight and express rates gladly quoted. Via Norfolk steamship lines, deliveries to northern and eastern points are quick and rates are low. See Boxford Nursery List also.

SHIPMENTS OF "COLLECTED" RHODODENDRON MAXIMUM and KALMIAS are from my special fields in Pennsylvania and the South, depending on destination and quality of stock desired. The best clumps come from the South, from high altitudes. **"COLLECTED" RHODODENDRON CATAWBIENSE** comes only from the South.

MY NURSERIES ARE UNIQUE, being the first to grow Native American Ornamentals, and having now the only large and complete stock of Hardy American Plants in existence.

SHIPPING BEGINS IN SEPTEMBER, when I send out large Rhododendrons, Kalmias and other evergreens, and bulbs and herbaceous plants, general stock going out in October and November; and in spring from about March 1 to May 15. Give shipping instructions, unless you wish to leave it to me, when I use my best judgment, but assume no risk.

EXPORT SHIPMENTS reach the most remote countries in perfect condition; I have exported for over twenty-five years, and know how to pack.

DESCRIPTIVE CATALOGS, beautifully illustrated, are mailed on request, and advice on the right way to grow Rhododendrons, Azaleas and other native plants gladly given. Send for "How to Grow Rhododendrons Successfully." Always address

HARLAN P. KELSEY, Owner

**Cemeteries, Botanical Gardens and
other Public Institutions a special
discount of 10%**

Views of Grandfather Mountain, 5,978 feet elevation in the Carolina Mountains, at the base of which is located Highlands Nursery, 3,800 feet elevation.

Grandfather Mountain is the home of the Rarest Hardy American Rhododendrons and Azaleas, the beautiful Carolina Hemlock, Tsuga caroliniana and other rare plants.

This region is the great cool Summer Resort for thousands from the "Piedmont" sections of the South.

CATALOG OF HIGHLANDS NURSERY

At my Highland Nursery, Pincola (Saginaw P. O.), North Carolina, 3,800 ft. elevation, on the crest of the Alleghany Mountains, one may see Rhododendrons, Azaleas, Leucothoës, Kalmias and Andromedas growing in all sizes by tens of thousands in single species, and nowhere else can be found such a collection of rare American plants of unquestionable hardiness—the best for American gardens.

The Carolina Mountains is the native home of the most beautiful Broad-leaved Evergreens and Ericaceous Shrubs. Highlands Nursery not only ships direct to customers, but is a great propagating plant, supplying material for my Boxford Nursery.

DECIDUOUS AND EVERGREEN

Trees, Shrubs and Woody Vines

NOTE.—All plants are transplanted and nursery-grown, unless plainly marked otherwise.

This is a catalog of nursery-grown plants growing at my Highlands Nursery, Saginaw, North Carolina. For catalog of Boxford Nursery, see pages following page 10.

TERMS

Terms cash, or satisfactory references from unknown parties. Accounts due the first of each month, unless by special arrangement. 5 at 10 rates; 50 at 100 rates; 500 at 1,000 rates.

An extra charge is always made for special selection.

Packing free at prices in these catalogs.

Send foreign remittances by Postal Money Order, drawn on Salem, Mass., post office; or by New York or Boston Exchange. An American dollar equals four shillings, four marks, or five francs.

GUARANTEE

No guarantee, expressed or implied, is made that stock will grow, whether planted by me or not.

Having no control over after treatment of plantings, or over weather conditions, it is obvious that purchaser must assume all responsibility after delivery in good condition.

All shipments travel at consignee's risk, and transportation companies must be held liable for damage in transit.

Claims for errors must be made on receipt of goods. If there is any mistake or fault on my part it will gladly be rectified.

CATALOG OF BOXFORD NURSERY

KELSEY'S Hardy American Plants, Rhododendrons and Fine Evergreens

THIS IS A PRICED CATALOG of my Boxford Nursery, located at Boxford, Massachusetts (East Boxford P. O.), on the Georgetown branch of the B. & M. R. R. Here may be seen growing the choicest collection of Specimen Nursery Stock, selected for the most discriminating buyers. Special attention is given to Hardy Native Material, which must always be the basis of successful permanent plantings.

SPECIMEN STOCK. There is a growing demand for fine specimen stock in Conifers, Rhododendrons, Kalmias, Andromedas and other evergreens, and my Boxford Nursery is established to supply just this need.

PRICES are made to fit the quality of stock sent out. Few realize that the real value of Nursery Stock is largely underground. Frequent transplanting, and handling specimens with adequate, burlaped balls, means success and quick results. It costs more, but it is the fixed policy of my Boxford Nursery; and "cheap" stock will not be handled or sent out. The best is always the cheapest.

PACKING CHARGES FREE at prices in this catalog for shipment by freight or express. Team and auto delivery to North Shore or Boston Points at net cost.

VISITORS ARE ALWAYS WELCOME at both Nurseries, or at my Salem office. Many customers take the trip to my Highlands Nursery in the Carolina Mountains during the blooming season of Rhododendrons and Azaleas. No such show can be seen elsewhere, and it is an outing worth while. I am glad to give details. Boxford Nursery is easily reached by train or automobile.

KELSEY'S Hardy American Plants Rhododendrons and Azaleas

Catalog of BOXFORD NURSERY

Rhododendron carolinianum, Proctor's Rock Garden, Topsfield

Rhododendron carolinianum

A new species. Clear pink

The smallest Alleghanian species, though it often attains a height of 15 feet and is wide-spreading. A very graceful shrub, with totally different aspect from the two species preceding. Leaves dark green, usually blunt and narrow, covered with rusty dots below, much smaller than either maximum or catawbiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species.

Until this year we have been sending this beautiful and rare species out under the name of *punctatum*. Prof. Sargent has recently called attention to the fact that it is a distinct species from the *punctatum* differing in time of bloom, with more showy and profuse flowers, and making a much larger and finer plant than the *punctatum*.

It is now known as *Rhododendron carolinianum*, being described and named by Alfred Rehder, Arnold Arboretum, Jamaica Plain, Mass.

The above illustration is from a photograph by Mr. Kelsey, May 21, 1913, at an estate in Topsfield, Mass.

7 to 8 crowns.....	1 75	15 00	
Dodecatheon (Shooting Star; American Cowslip). These are among the most charming of all our early wild flowers. The species offered below are easily grown in borders where they are subject to considerable drought after blooming.			
<i>clevelandi</i> . Tall-growing form, with pure white or delicate pink flowers.....	10	100	
<i>hendersoni</i> . Another of the best species with red flowers.....	\$1 00	\$4 00	
<i>patulum</i> . White, pale cream-color or rarely pinkish.....	1 00	4 00	
<i>radientum</i> . Flowers deep rose-color.....	1 50	8 00	
<i>Drosera rotundifolia</i>		1 00	8 00
Erythronium (Dog's-Tooth Violet). These small, bulbous plants are extremely handsome in foliage and flowers, but to get best results should be massed in cool, moist woodlands or borders or along streams. They are among the earliest spring flowers and, with their mottled leaves, make a very fine, early ground-cover in shady locations.			
<i>album</i> . Leaves not mottled. Flowers French white, yellow at base.....	Each	10	1,000
<i>americanum</i> . Bright yellow. Leaves mottled white. Common throughout eastern states.....		\$1 50	\$12 00
<i>californicum</i> . Cream-colored flowers, often 4 to 5 on a stem, and richly mottled leaves.....		50	2 00
<i>citrinum</i> . Light yellow, orange at center, tips becoming pink.....		\$10 00	
<i>giganticum</i>	50	2 00	16 00
<i>grandiflorum</i> . Bright yellow, with unmottled leaves.....	1 00	4 00	35 00
<i>hartwegii</i> . Yellow, each flower on a separate stalk.....	1 00	4 00	35 00
<i>hendersonii</i> . Flowers light purple with dark centers.....	50	2 50	10 00
<i>purpurascens</i> . Small, spreading flowers crowded in a raceme; light yellow, becoming purplish. Smallest species.....	1 00	4 00	35 00
<i>revolutum</i> . Pink flowers, becoming purple.....	1 00	4 00	35 00
<i>Eulalia gracillima</i>	\$0 25	2 00	15 00
<i>Eupatorium ageroides</i> . White Snake-root.....	15	1 25	10 00
<i>purpureum</i> . Trumpet Weed.....	20	1 75	15 00
<i>Festuca glauca</i>	20	1 50	12 50
<i>Fritillaria biflora</i> . Nearly black. Low; bell-shaped.....		1 25	0 00
<i>pluriflora</i> . Very fine. Nearly purple red.....		1 25	6 00
<i>coccinea</i> . Deep crimson.....		1 00	4 00
<i>lanceolata gracilis</i> . Nearly black-purple.....		1 25	6 00
<i>recurva</i> . Orange-scarlet. $\frac{3}{4}$ to 1 in. diam.		75	3 00
1 to $1\frac{1}{4}$ in. diam.....		1 00	4 00
Order Fritillarias before Oct. 1, if possible.			
<i>Galax aphylla</i> . Galax, or Coltsfoot.....	35	2 25	18 00
<i>Habenaria olivaris</i> . Yellow Orchis.....	15	1 00	8 00
<i>Helenium autumnale</i>	15	1 00	8 00
<i>Hemerocallis</i> . Swamp Pink.....	20	1 25	10 00

Eupatorium ageratoides. A splendid "filler" for Shrub Plantings, blooming in September. Fine as cut-flowers.

The beautiful *Stenanthium robustum* at Highlands Nursery. It seems difficult to establish this remarkable plant in the North and West. At Tapsfield, Mass., it is thriving in open sun on the "mucky" border of a pond.

Abies fraseri, or Fraser's Balsam, as a windbreak or screen at Highlands Nursery. This splendid Evergreen is a revelation to those who have found out its great superiority to the *Abies balsamea*.

KELSEY'S Hardy American Plants Rhododendrons and Azaleas

Catalog of BOXFORD NURSERY

Abies fraseri

“And to paint these home pictures we need chiefly American material. We must face this deadly parallel:”

What We Really Plant

70% European trees and shrubs and horticultural varieties.

20% Chinese and Japanese.

10% American.

What We Ought to Plant

70% American trees and shrubs, i. e., native to America.

20% Chinese and Japanese.

10% European and horticultural.
